

## Supported Bluetooth Scanners

Doubleknot's apps for iOS now support handheld Bluetooth scanners:

- With the Doubleknot Event Checkin app, you can scan tickets with the handheld scanner instead of your iOS device's rear-facing camera.
- With the Doubleknot Sales Station app, you can scan receipt barcodes to display the order. (All Doubleknot receipts display a barcode for the order number.)

The following scanners are supported:

- Socket Mobile CHS 7Qi - 2D / 1D Imager Barcode Scanner (multiple color options)
- Socket Mobile CHS 7Xi & 7XiRX - 2D / 1D Imager Barcode Scanner (durable)
- Socket Mobile CHS 8Qi 1D/2D Imager Barcode Scanner

Socket Mobile scanners are available directly from Socket Mobile as well as from many vendors. For more information, visit Socket Mobile at <https://www.socketmobile.com>.
